

How to change your password for word email on your Android Smart Device

Some users may receive the following pop-up message on their Android device after they change their network password. All you have to do is type in your new password and you should be good to go.

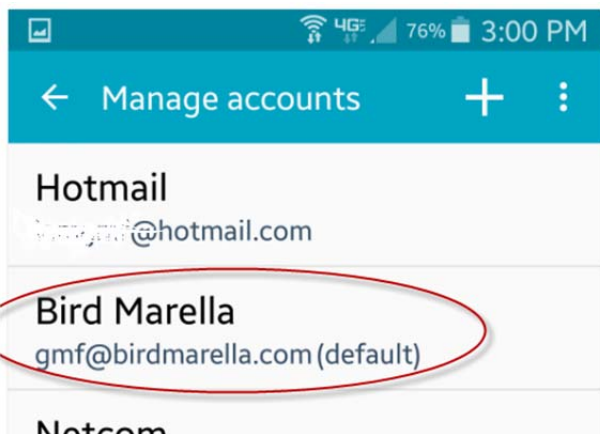

To manually change your password, please follow the instructions below.

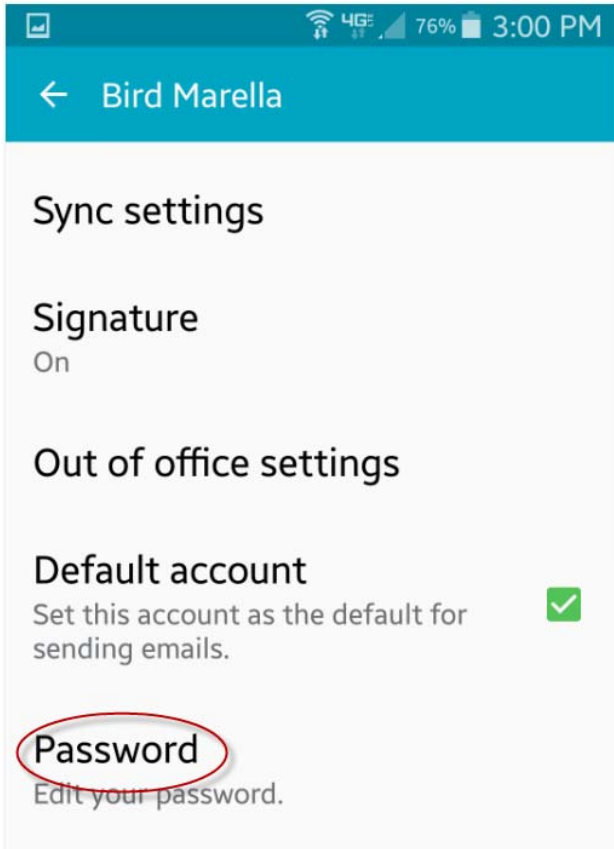

Click on the 3-line icon (circled in red in upper left corner of image below)
Click on “Manage Accounts” (circled in green at bottom of screen)

Click on email account you would like to change.

Click on "Password"

Type in new password and click OK.
